General Conditions for Construction of Vehicle Entrances / Driveways by Private Contractors

Within the City of Rockdale the following key conditions for the construction of vehicle entrance / driveway by private contractor apply:

- The construction of a concrete or paved vehicle entrance / driveway over Council property can be done by a private contractor of your choice.
- The contractor you select will need to supply Council, at time of application, with evidence of the following:
 - ♦ A certified copy of your contractor's Certificate of Currency (valid for at least 3 months) verifying Public Liability Insurance of at least \$10,000,000;
 - ♦ A \$733.50 bond from the contractor - refundable upon satisfactory completion of the works; and
 - ♦ Proof of the contractor's workmanship by providing details of work undertaken in the local area.
- The type of construction is limited to:
 - ♦ Plain concrete
 - ♦ Faux brick finished concrete
 - ♦ Concrete or clay pavers on a 20 MPa concrete sub-base 100mm thick.
- Alternative finishes such as pebblecrete (washed concrete), stamped concrete, glazed pavers, tiles or slate are **NOT** permitted.
- For Single Dwellings and Dual Occupancy - Concrete is to be a minimum of 125mm thick reinforced with SL-72 mesh and a compressive strength of 25 MPa at 28 days.
- For Villas, Town houses, Residential Flat Buildings, Commercial, Industrial and Mixed Use- Concrete is to be a minimum of 150mm thick reinforced with SL-82 mesh and a compressive strength of 25 MPa at 28 days.
- Council will not accept responsibility for matching surface finishes when restoring the works of public utilities. (If pavers are used it is suggested a supply of extra pavers be kept for this purpose.)
- The appropriate fee must accompany this application. The fee covers the cost of supplying levels and three inspections. Inspections will be done at the following stages:
 - ♦ Initial inspection to determine vehicle entrance / driveway design, specifications and extent of work;
 - ♦ Inspection of sub-grade, formwork and reinforcement prior to pouring concrete or laying pavers; and
 - ♦ Final inspection one month after completion of the work.
- Note: Additional inspections will be charged at the rate of \$137.50 (inc GST) per inspection.
- The present and future owners of the property will be responsible for all maintenance of the vehicle entrance / driveway. All future owners will be advised of their responsibility in this regard through the 603 Certificate.
- Where the vehicle entrance / driveway is not maintained safely Council reserves the right to repair or reconstruct the vehicle entrance / driveway without notice to protect the public, and charge the owner for the cost of the work.
